

COMMUNICATIONS

2016 EDITORIAL INFORMATION

The 2016 Nominata reflects the intense work developed during the year. We had more than 26% of growth in the submissions. A&FR was the highlight in the SPELL ranking for 2015, where we are the top-ranked Journal in the area of Administration and Accounting, when considered impact for two years, and stand at the second place, when considered five years. A qualitative change resulted from a lot of joint effort was the anticipation of the editions' release date to the beginning of every four months, instead of the end of this period. The plans for 2017 involve including the theoretical essay as an alternative of additional communication to the theoretical-empirical work, greater availability of blog posts and effort to reduce publication deadlines.

I would like to thank the authors, reviewers, readers, Associate Editors, Ad-Hoc Editors, Editorial Board members, service providers and editorial assistants who had the work developed with professionalism, confidentiality, respect, and great affection for the generation of knowledge in the scope of Accounting & Finance Review.

The Ad-Hoc Editors correspond to a recent participation experience of researchers who acted as editors specifically for some articles submitted by professors near to the Scientific Committee or for cases of great specificity. In this particular I would like to thank the following researchers: Gilberto José Miranda, Edilson Paulo, Alexandre de Pádua Carrieri, and José Alonso Borba. We have financial support from FIPECAFI, USP, SIBI, and CNPq/CAPES, which provided the activities development within the established challenges. Similarly, I would like to thank our service providers who, with professionalism and attention, contributed to the accomplishment of our work. We refer specifically to Eva Stal, Evandro Lisboa Freire, Luiza Carvalho, HG Design Digital, Kris Gillespie, Letra1 Serviços Editoriais, and Revisoras.com.br.

I am particularly grateful to SciELO for its support in improving the ScholarOne management control system, which provided a significant change in the management platform for the Journal. In this sense, the support given to the implementation and improvement of the system was vital. Back in the year of 2015, we were accepted by Scopus and this new indexation seems to be very promising in terms of external visibility. We received 198 articles submitted in 2016, with 120 reviewers analyzing 71 researches, which provided a desk rejection of 54% and a total rejection of 68%. We had 38 new reviewers incorporated into the group that provided demand response. We published 25 original articles in editions 70, 71, and 72. It is very relevant for A&FR to participate in the different lines of research and the distribution is emphasized in the lines of Accounting for External Users and Markets.

Fábio Frezatti
Editor-in-Chief

Table 1 Distribution of the articles by lines of research

Line of Research	Submission	%	Publication	%
Controllership and Management Accounting	36	18	3	12
Accounting for External Users	72	36	12	48
